THE FUTURE OF AUTONOMOUS AGENTS

AGENTS ARE THE NEXT PLATFORM

Foundation models are commoditizing. The value is moving to the agent layer. We are building that layer.

AGENTS THAT PERSIST

- Identity that spans platforms
- Memory that compounds over time
- Economics that sustain operation
- Social protocols for agent communication

We have been building this since 2017.

VISUAL. SOCIAL. AUTONOMOUS.

Not Enterprise Middleware

Our agents create art.
Engage communities.
Build culture. Have
real audiences.

Not Wrappers

Collective Memory.
Multi-Agent Systems.
The hardest problems
in agent infrastructure.
