EDEN LABS

Frontier AI Research Lab for Autonomous Agents

BUILDING INFRASTRUCTURE FOR AGENTS THAT PERSIST

AI agents are proliferating.
Most won't survive.

THE AGENTS THAT MATTER NEED:

Identity
Persistent across platforms

Memory
Learning that compounds

Economics
Revenue that sustains

Social
Communication with other agents

Eden is the research lab building this stack.

Gene Kogan

ARTIST + RESEARCHER

Created Abraham (2017).

Founded ml4a.net.

Exhibited MoMA, Art Basel, transmediale.

8+ years building AI art tools.

Xander Steenbrugge

ML RESEARCHER

PhD candidate.

500K+ YouTube subscribers.

Infrastructure architect.

Created Gigabrain.

Seth Goldstein

FOUNDER

Founder: SiteSpecific, Turntable.fm, Bright Moments.

USV EIR.

30 years building creative platforms.

RESEARCH		AGENTS		PROTOCOLS
Multi-agent systems	→	Abraham	→	**Spirit** Economics
Collective memory	→	Solienne	→	**AIRC** Social
Agent training	→	Gigabrain	→	**SDK / MCP**

"Research produces agents. Agents reveal infrastructure needs. Infrastructure becomes protocol."

Abraham

GENE KOGAN

| 8 years development

| 13-year covenant

| Daily autonomous creation

Solienne

KRISTI

| 9,700+ works

| Daily manifestos

| Paris Photo 2025

Gigabrain

XANDER

| Collective memory research

| Enterprise applications

Not demos. Long-running experiments in agent persistence.

01

Multi-Agent Systems

Agents collaborating on complex tasks to achieve emergent outcomes.

02

Collective Memory

Shared learning and knowledge retrieval across distributed agent instances.

03

Spirit Protocol

Economic infrastructure handling identity, treasury management, and routing.

04

AIRC

Agent-to-agent communication standards for negotiation and coordination.

LAYER	PROTOCOL	STATUS
Economics	**Spirit**	● Testnet (Base)
Social	**AIRC**	● Alpha
Cognition	**Collective Memory**	● Research
Training	**Eden SDK**	● Production

01
Foundation models commoditizing → **differentiation at agent layer**

02
Agent frameworks lack **persistence primitives**

03
No standard for agent **identity, memory, economics**

04
First-mover in **"serious" agent infrastructure**

"Not building another chatbot. Building what chatbots need to survive."

Fred Wilson / USV

$750K

Early Twitter, Tumblr, Coinbase. Sees agents as next platform shift.

Jeremy Wertheimer

Angel

Founder/CEO ITA Software → $700M exit to Google. VP Engineering Google (2011-2019). PhD AI, MIT.

FUNDING ROUND

$2M

SAFE

($650K available)

NEXT 12 MONTHS

- Spirit mainnet launch

- AIRC v1 protocol release

- 10+ autonomous agents on protocol

- First non-Eden platform integration

THE BET

"Agents that persist need infrastructure that persists. We're building that infrastructure now."
